New Features

- The *nav* command supports the NMEA 0183 sentence: RMC, e.g. position, speed over ground and course over ground are displayed if RMC is transmitted.
- Window resize is supported.

Changes

- Warning message is printed if heading offset is set while the unit has large offsets on pitch and roll (> 10 degrees).
- Warning message is printed if too many NMEA 0183 sentences are activated (for the current baud rate).

Fixes

- LTS-99: Erroneous configuration of actual heading on some courses
  - Command *heading <actual heading>* failed in some cases.
