

PRESS RELEASE

New Satellite Communication Terminal from Lars Thrane A/S

Lars Thrane A/S is today presenting its first satellite communication terminal. The **LT-3100 Iridium Communications System** will be shown to public at the exhibition SEA ASIA in Singapore running from April 25 to 27. The terminal will be available this Summer.

The LT-3100 Iridium Communications System is a maritime satellite communication product, designed for the professional market (deep sea, fishing, and workboats), but can be used for the leisure market as well.

The LT-3100 system has voice and data capabilities with 100% global coverage via the Iridium satellites. The LT-3100 system consist of a control unit, handset-unit, and antenna unit. A single coaxial cable connects the control unit with the antenna unit. Up to 500 meters of separation between the units can be obtained, giving freedom to mount the antenna in the best possible location, with free line of sight to the satellites.

The LT-3100 Iridium Communications System offers the following features:

- Voice, SMS, Data, and Vessel tracking
- 2.4 kbit/s and 10 kbit/s compressed data
- Single antenna cable solution (up to 500 m)
- High-performance GNSS/GPS receiver
- Noise-canceling microphone and equalizer for improved audio quality
- Bluetooth interface supporting voice, SMS, and data
- Large 4.3" TFT display supporting day and night modes
- Connectivity of Smartphones, Softphones, and Apps

About Lars Thrane A/S:

Lars Thrane A/S specializes in design and manufacturing of high-performance satellite communications systems and navigation sensors using the latest, innovative and ground breaking technology. With a strong background in satellite communications engineering, and experience in the development of maritime communications and navigation equipment, Lars Thrane A/S brings high performance products into the maritime world of tomorrow. Our products are for the maritime professional and leisure markets. Lars Thrane A/S is a privately-owned company headquartered in Copenhagen, Denmark.

About Iridium Communications Inc.:

The only satellite communications company that offers truly global voice and data communications coverage. A technology innovator and market leader, Iridium, in collaboration with its vast partner network, is advancing the way global enterprises conduct daily mission-critical activities through reliable, low-latency communications services.

Iridium's 66 low-Earth orbiting (LEO) cross-linked satellites – the world's largest commercial constellation – operate as a fully meshed network.

Reaching across land, sea, and air, including the polar regions, Iridium® solutions are ideally suited for industries such as maritime, aviation, government/military, emergency/humanitarian services, mining, forestry, oil and gas, heavy equipment, transportation and utilities. Iridium also provides service to subscribers from the U.S. Department of Defense, as well as other civil and government agencies around the world. Iridium sells its products, solutions and services through a network of service providers and value-added dealers.
